

今天总结:

1. 搭建了github仓库
2. 创建了个项目
3. 做了些前端代码

```
1 import { createApp } from 'vue'
2 import App from './App.vue'
3 import router from './router'
4 import store from './store'
5
6 // 引入 Element Plus 和其样式
7 import ElementPlus from 'element-plus'
8 import 'element-plus/dist/index.css'
9 // 引入 Element Plus 图标 (如有需要)
10 import * as ElementPlusIconsVue from '@element-plus/icons-vue'
11
12 // 引入全局样式
13 import './styles/global.css'
14
15 const app = createApp(App)
16
17 // 注册所有图标
18 for (const [key, component] of Object.entries(ElementPlusIconsVue)) {
19   app.component(key, component)
20 }
21
22 app.use(ElementPlus)
23 app.use(router)
24 app.use(store)
25
26 app.mount('#app')
```
